

MULTIPLICATION GO FISH

1. **Print these cards front to back. Print on cardstock or laminate the cards with clear contact paper to make longer-lasting cards.**
2. **Cut each rectangle out.**

Deal 7 place value go fish cards to each player. Put the remaining cards in a pile face down in the middle.

Step 1: Each player will look at the cards in their hand. If there are two cards that match in their hand, the player will lay the match down.

Step 2: Players take turns asking their partner for a card that will match a card in their hand. If partner 1 has the card partner 2 asks for, partner 1 must give the card to partner 2. If partner 1 does not have the card, partner 1 says, "Go fish" and partner 2 must draw a card.

Step 3: Each time a player makes a match, lay the match down.

Step 4: When a player runs out of cards, or all the cards are matched, the game is over. The player with the most matches wins!

*Each math fact is repeated twice in this deck, you can play with the full deck or only use one set (tan or light blue).

MULTIPLICATION MEMORY

1. **Print these cards front to back. Print on cardstock or laminate the cards with clear contact paper to make longer-lasting cards.**
2. **Cut each rectangle out.**
3. **You will need a big place to play: either a large table or the floor**

Object of game

To get as many matched pairs of cards as possible. The player who gets the most matched pairs wins.

Directions

- The youngest player goes first.
- The player turns over two cards, one at a time.
- If the cards match (equation and answer), the player takes the cards and turns over two more cards.
- If the cards do not match, the player turns the cards face-down. Play passes to the next player to the left.
- Play continues until all the cards have been picked up.

Strategy to teach- You should watch carefully and remember where cards are located. Then, when you turn over your first card, you may remember where to find a matching card.

*Each math fact is repeated twice in this deck, you can play with the full deck or only use one set (tan or light blue).
